Summary

Full Stack Developer with a strong understanding of designing and building production-ready web applications. Passionate about creating scalable, maintainable, and user-focused software with a deep understanding of application architecture and real-world development practices. Enjoy solving complex problems by focusing on clean system design rather than just writing code. Currently exploring the AI ecosystem, including Generative AI, AI agents, and modern AI application frameworks, with the goal of building intelligent, AI-powered web applications that deliver practical value.

Education

AKS University

Bachelor of Technology in Computer Science and Engineering

Satna, Madhya Pradesh

Aug 2022 – June 2026

Technical Skills

Languages: C, C++, JavaScript, Python, TypeScript, SQL

Frontend: React.js, Next.js, Tailwind CSS, Redux Toolkit, Bootstrap

Backend: Node.js, Express.js, FastApi, REST APIs, OAuth

Database: MongoDB, PostgreSQL

Cloud & Deployment: AWS, Vercel, Render

Developer Tools: Git, GitHub, VS Code, Postman

Core Concepts: Data Structures & Algorithms, OOP, Full Stack Development

Experience

Full Stack Developer Intern

Feb 2026 – April 2026

Dollop Infotech

Indore

- Contributed to multiple production web applications in an agile team environment, shipping features used by real users
- Integrated third-party and internal REST APIs across courses, placements, and testimonials modules using Axios
- Implemented Redux Toolkit for scalable global state management across a large-scale frontend codebase
- Resolved production-level middleware, routing, and responsive UI bugs under active deployment constraints

Freelance Full Stack Developer

- Built a customer management system (a prepaid meal token management system) for a restaurant based in Indore, replacing a fully manual paper-based billing workflow
- Built thermal receipt printing integration, token renewal flows, and daily billing operations
- Developed an analytics dashboard with real-time revenue tracking, token usage stats, and active customer records
- Stack:** Next.js 14, TypeScript, MongoDB Atlas, Tailwind CSS, Vercel

Projects

AI-Powered Learning Management System | *React.js, Node.js, MongoDB, Cloudinary, Stripe, Gemini API*

- * Built a full-stack Learning Management System with course creation, video content delivery, and payment gateway
- * Implemented Stripe for course payments and Cloudinary for scalable video/media hosting
- * Built an AI Doubt Solver using the Gemini API to answer student questions contextually within course content

Full-Stack Job Portal Platform | *React.js, Node.js, Express.js, MongoDB, Redux Toolkit,*

- * Built a role-based job portal with distinct workflows and protected routes for job seekers and recruiters
- * Developed recruiter dashboard for managing company profiles, posting listings, and tracking applicants in real-time
- * Implemented dynamic job discovery with advanced filtering and application status tracking for candidates
- * Integrated Redux Toolkit with redux-persist for session persistence and Cloudinary + Multer for file uploads

Achievements

- Solved 250+ Data Structures & Algorithms problems on LeetCode
- Independently shipped a live production system for a real client from design to deployment without supervision
